

Who in San Diego County Would Be Affected by the Governor's Proposed Budget?

The Governor has proposed substantial reductions to virtually all state-supported services to close the state's budget gap. The Legislature will consider these proposed reductions and other options during upcoming budget hearings. Who in San Diego County would be affected by the Governor's proposals?

- 434,910 students served by San Diego County's public schools. Cuts to five of the largest funding allocations for public schools in the county would equal \$636 per student.
- 8,940 low-income children dropped from the CalWORKs Program.
- 84,680 low-income seniors and persons with disabilities who would lose the state cost-of-living adjustment for Supplemental Security Income/State Supplementary Payment cash assistance grants.
- 22,210 low-income seniors and persons with disabilities who would receive fewer hours of services through the In-Home Supportive Services Program.
- 1,270 fewer children enrolled in child care and preschool due to funding cuts to child development programs.
- 7,620 low-income children in 2008-09 – and a total of 13,870 children by 2009-10 – who would lose Medi-Cal coverage due to increased paperwork requirements.
- 356,570 low-income Medi-Cal recipients who may have reduced access to health care services because of payment cuts to health care providers.
- 80,210 children enrolled in the Healthy Families Program, which provides low-cost health coverage for children in low-income working families. The Governor proposes to increase family premium contributions and copayments and reduce dental services.
